OUR COMPOSITE DECKING IS  
**Designed for *Style.***  
**Built for *Performance.***

*For more than 20 years, we have been helping people create the outdoor space of their dreams. Our Compress Technology™ manufacturing process ensures your new outdoor space has unmatched character and performance you can trust.*

*Compression molded, not extruded, to create decking that's dense, strong, and engineered to last.*

*Less moisture absorption and resistant to splitting, splinters, insects, and rot.*

*Deep, non-repeating grain and striking colors make each board truly unique, emulating exotic hardwoods.*

“ With the color variegation in the boards, you don't find anything else unique that changes from board to board. Most of the competitors are a little more set-in stone, and even boring. I also like the texture in the boards, it gives it a feel on your feet like it's not a manmade product. It almost feels real to me.

Distinction goes great with everyone wanting to get that hardwood look from afar. You actually get that natural hardwood look because the boards never repeat.

”

## DISTINCTION®

### EXCEPTIONAL BEAUTY

The rich colors and bold highlights of our Distinction Collection are designed to emulate the textures and natural color variations found in exotic wood. The blend of beauty and performance that Distinction provides ensures you have a one-of-a-kind deck that is built to last.

I love Envision Outdoor Living! Low maintenance decking & railing options rarely have the incredible variety in selections that Envision offers - there are so many great colors, textures and profiles. My favorite combo is the Distinction Spiced Teak paired with the Fairway aluminum railing - so good!

Envision decking is dense. We know that it will take a screw cleanly with lots of holding power due to the density of the product. The same with cutting. The density reduces chip-out and ensures a clean cut every time.

Colors will usually weather to a lighter shade within the first several months of exposure to the environment.

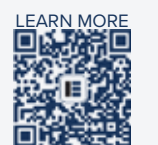

I like Envision composite decking because a lot of planks are different—it makes it look more natural when you mix them up. That's what my clients want: low maintenance but with that real wood look.

Envision decking products are non-structural products and should not be used in a structural manner, including use as joists, load-bearing columns, stringers, or beams. Representation of these colors is as accurate as modern technology will permit. As with any composite product, color variations will occur. View several full-length boards prior to final color selection. Colors will usually weather to a lighter shade within the first several months of exposure to the environment.

Color selection may vary across profiles. For product specifications, installation or technical questions, and additional information please visit [EnvisionOutdoorLiving.com](http://EnvisionOutdoorLiving.com).
